PROFESSIONAL SUMMARY

Motivated Computer Science & Engineering student with a strong foundation in software development and modern IT technologies. Skilled in building scalable, responsive web applications using Angular, ASP.NET MVC/Core, C#, and SQL Server. Proficient in software engineering principles, system development processes, and leveraging modern development tools to create efficient solutions. Seeking opportunities to contribute to both software development and technical IT roles, with a focus on continuous skill enhancement and real-world impact.

WORK EXPERIENCE

Jr Full Stack Software Engineer — Global Software Architects

[April 2026 – Present]

- Angular & ASP.NET Core development.
- REST API integration.
- Reusable UI development.
- SQL Server management.
- Feature implementation & bug fixing.
- Performance optimization.
- Agile Scrum collaboration.
- Testing & debugging.

Junior Software Engineer — TechStdio

[August 2025 – March 2026]

- Angular & ASP.NET Core development.
- Reusable UI component creation.
- SQL Server CRUD operations.
- Feature implementation support.
- Agile Scrum participation.
- UI/UX performance improvements.
- Testing, debugging, and documentation.

EDUCATION & ACADEMIC HISTORY

IUBAT- International University of Business Agriculture & Technology

2022 - 2026

- Bachelor of Computer Science and Engineering
- CGPA 3.73 / 4.0

HSC- Mohammadpur Kendriya College

- Science Group
- GPA: 5.00/5.00
- Board- Dhaka
- Passing Year- 2020

SSC- Konda School and College

- Science Group
- GPA: 4.61/5.00
- Board- Dhaka
- Passing year- 2018

TECHNICAL SKILLS

- Frontend: HTML5, CSS3, JavaScript, Bootstrap5, TypeScript, Angular.
- Backend: ASP.NET Core in Web API and MVC, C#.
- Database: SQL Server, PostgreSQL, LINQ.
- ORM: Dapper Context, EF Core, ADO.NET.
- Tools: Git, GitHub, Visual Studio, VS Code, SQL Server.
- Networking Basics: IP Addressing, Subnetting.
- Others: C, C++, OOP, REST API Development, SignalR, Background Service, Payment Gateway Integration, JQT, SMTP Server attachment.
- Machine Learning using Python

SOFT SKILLS

- Microsoft Office proficiency
- Communication Skills
- Team Collaboration
- Continuous Learning
- Adaptability
- Problem-Solving
- Attention to Detail
- Time Management

PROJECTS

Alongside delivering enterprise-grade backend systems and scalable software solutions in professional environments, I have engineered the following full-stack platforms:

- Project Title: "AI Hera Jersey Club – E-Commerce & Custom Apparel Platform"
- Link: https://github.com/tawhid-11/AlHeraJerseyClub
- Description: Tech Stack: ASP.NET Core Web API, C#, SQL Server, Dapper, Bootstrap, JavaScript, TypeScript
- Developed a dedicated sportswear customization and order management platform. Built high-throughput backend APIs using Dapper and SQL Server for fast database operations. Integrated customized jersey specification workflows, automated invoice/memo generation, and responsive customer-facing interfaces.

- Project Title: "SportsHub – Real-Time Tournament Management and Live Score System"
- Link: https://github.com/tawhid-11/SportsHubBackend, https://github.com/tawhid-11/SportsHubFrontend
- Description: Tech Stack: ASP .NET web API, C#, Dapper Context, SQL Server, Angular.
- Developed SportsHub, a web application to manage players, team owners, and multiple real-time tournaments. Built ASP.NET Core Web API with Silo architecture for scalable backend services and real-time updates using SignalR. Integrated payment gateway for secure transactions and implemented background services for scheduling and notifications. Frontend developed with Angular, database managed via SQL Server, and reusable UI components enhanced user experience.

CERTIFICATIONS

- Python with Machine Learning — Creative IT Institute
- Full-Stack Development (Angular & ASP.NET Core) — Tech Stdio
- Cisco Packet Tracer — Udemy
- AI-Powered Communication - GP Academy

LANGUAGE

- Bangla
- English
- Hindi

CO-CURRICULAR ACTIVITIES

- Participated in university workshops and seminars.
- Active member of Computer Science Club & Web Dev communities.
- Learning the working mechanism on new tools
- Completed online courses in Angular, ASP.NET Core.
- Worked in team-based academic projects.
- Helped organize university tech events.

INTERESTS

- Exploring new web and software technologies
- Developing small projects and contributing to open-source
- Learning about cybersecurity and data protection
- Solving Problem in Codeforces and LeetCode
- Following sports events and analyzing game strategies
- Reading tech blogs and watching tutorials for continuous learning
- Interests on Computer Netwroking
- Interests on Research on Cyber Security
